

Resource 1.3: Examples for spot check questions

Interviewers observe the following, depending on the target behaviour:

Water treatment – solar water disinfection (SODIS)

- Are there any PET bottles placed outside the house?
- How many?
- Where?
- Are they in the sun?
- Is the water in the bottles clear?

Water container

- Does the storage container have a cover?
- If yes: Is it presently fully covered?

Open defecation and latrine use

- Are there any human excreta in the wider surrounding of the house?
- Is there access to a latrine for defecation?
- Does the latrine smell (faecal odours)?
- Are flies present?

Handwashing:

- Where is the hand washing place located?
- Which water device is present for handwashing?
- Is water present?
